5 April 1951

REFERENCES PAGES 1 ENCLOSURES (NO. & TYPE) REMARKS

50X1-HUM

1. The Erfurt-Bindersleben (N 51/J 26) airfield was not occupied by aircraft on 22 February 1951. The last landing on the field was made by a Soviet twin-engine plane in January 1951. Construction was being done on the field by approximately 250 laborers. Bauunion-South Volkseigener Betrieb (nationalized plant), Jena (N 51/J 66), had the contract for the work. Grading of the landing field was to begin in April 1951. ☐ 50X1-HUM
2. A dwelling or administration building was completed. Two hangars, each about 8x30x32 meters were under construction. ** Two temporary buildings for the construction laborers were set up near the hangars. Six Diesel locomotives with about 60 to 80 dump-cars were seen on the narrow-gauge field railroad tracks which were laid between the hangars. Boards and beams were stored on a large timber dump near the temporary buildings. ☐ 50X1-HUM
